

FRAMEWORK AT A GLANCE

The framework agreement is compliant, easy to use and an all-encompassing route for all cashless payment requirements.

This framework has been developed to enable an efficient route to purchasing new technology for cashless payment systems through a one-stop-shop. This allows for organisations to procure all of their software and hardware requirements from a single source via direct award or through a further competition process, rather than having to run multiple tendering exercises.

The framework can be utilised for the procurement of cashless payment solutions for:

- Catering;
- Cafeterias/Restaurants/Canteens/Refectories/Dining Rooms/Tuck Shop
- Pre-order and pay for food online, input dietary and allergy requirements
- Pre-loaded cards e.g. Mifare
- Vending machines
- Retail – bookshops, branded items, clothing, school uniforms, stationery
- Trips and accommodation
- Tuition fees
- Sports/Gym/Clubs & Societies
- Conference Centres & Event Management – accommodation, meals, event workshops, parking
- Libraries
- Personal Lockers and storage Lockers
- Car parking – barrier/building/door entry systems
